Software Developer

Personal profile statement

A motivated, adaptable and responsible High school graduate seeking a position in software engineering which will utilize the professional and technical skills developed through exclusive experience in the previously completed projects. I have a methodical, customer-focused approach to work and a strong drive to see things through to completion. In my current job, I have managed the launch and migration of two major web platforms which were completed on time and within budget.

Achievements

- Implementation major systems with zero downtime and zero data loss
- Leading a project team till the completion of the project ([Bookinga project](#))
